Applications 02/04

Issue 33

POP® SNSK3030BH & SNSK3035BH

Application:

Fan Tray Assemblies in electrical enclosures where space is at a premium.

Customer Need:

A high speed blind fastening solution with no blind side protrusion (< 0.3mm). The current mandrel-less solution had to be manually ground down after setting to prevent interference.

POP® Solution: SNSK3030BH / SNSK3035BH with Rivet Presenter

Steel, Open Thin Flange Countersunk Rivet with Break Head Mandrel

Features & Benefits:

- Flush setting on both sides.
- Improved clamp, shear and tensile over current solution.
- Break Head Mandrel ensures high clamp force and head ejection - thereby eliminating the risk of loose mandrel heads in the final enclosure.
- Designed for use in double countersunk sheets and for rapid installation using **POP®** matic Assembly Systems.
